REVIEW

To ensure highest return on investment and optimum performance level, it is important to assess compliance level for infrastructure components and then create requisite plan for improved performance and standard compliance.

Outstart Tech objectively reviews your infrastructure component with respect to reference standards for bench marking and performance improvement recommendations.

Reason to partner with...

Focus

Outstart Tech has never diluted its continued leadership efforts by getting it involved in the business activities not in line with its vision, mission and core competence. Outstart Tech has since the beginning has been concentrating on the technology infrastructure element integration with the targets to develop the scalable, reliable and available technology infrastructure Solutions.

Experience

Outstart Tech was incorporated in the year 2007 as a unique concept of vendor independent integration Services Company providing the heterogeneous platform integration for servers, networks and databases. Over the years we have added the skills and competence to address the more recent infrastructure needs of storage, middleware and security.

Resources

Outstart Tech believes that to be a partner to its vendors, employees, customers and investors, it needs to invest in usable assets and resources that will bring long-term commitment to market. Over the years Outstart Tech has invested into those assets that make the backbone of the organizational resources to help us develop productive environment, reach and financial stability.

Reason to partner with...

Best Team the Competence factor

The industry certified skills with IBM, HP, 3M and Allied Telesis certified consultants - are the most important component of Outstart Tech Best Team which also consists, MCAs, MBAs and business and system analysts with wide industry experience. Our team thus, possesses a deep understanding of both technology and business processes.

We have developed unique programs to reach and partner with the best talent and skills in the industry. And a corporate environment designed for and by technical managers, which allow us to attract, train and develop a continuously evolving partnership with the "BEST of the BEST".

Each Outstart Tech team member has the expertise on at least one niche area of the technology and is further developed by the rich experience he/ she is exposed to on some of the unique multi-platform and proprietary forms of networks and storage at our Knowledge Management Center. The principle that keeps the team technologically ahead of anyone else is to constantly develop the expertise through experience, document experience as information and let information be available as knowledge.

This knowledge is the Team Intellect which has an answer to all the complex requirements of the heterogeneous computing environments and to deliver the best technical solutions to new emerging issues of

High availability, systems manageability, disaster recovery planning and to control the TCO.

Reason to partner with...

Methodology

Our best practice, solutions and case studies are all documented in the OUTSTART TECH Methodologies. Our approach ensures that every client constantly receives a high level of services - no matter where they are on the globe, what team is deployed or how complex and heterogeneous is his computing environment.

We believe that the best solutions come by following the quality practices. We have quality process documents designed by some of the most renowned industry consultants.

Value proposition

With the IT industry gaining maturity there has been “ clear definition of strengths” among various organizations and during the last five years market had new leaders with focus and their respective value addition strong areas, this brought the emergence of OEMs focusing on product development and manufacturing, Distributors managing the multi-location logistics, resellers and retails filling the niche of servicing small and home users, Application software developers and implementers creating business in their strong industry domain such as finance, manufacturing , telecom etc.

However the most successful and skills based value added to the field of information technology have been the Systems Integrator.

Outstart Tech is defiantly not an OEM, distributor or resellers. And it brings the value through its skills and experience by integrating and managing the most available and scalable infrastructures solutions with is easy to manage and have lower cost of ownership.

Competitive advantage

Unlike a product, systems integration is a “people” based solution creation and delivery business. Outstart Tech due to its team, patented methodology, experience and market credibility has a strong

Edge over any mid-size SI and our flexible approach and cost competitiveness makes Outstart Tech a much preferred partner in the market place over large SIs such as Lenovo, HP and Allied Telesis.
